AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings of claims in the application:

Listing of Claims:

1. (Original) A process of using of at least one member selected from a first group consisting of compounds conforming to formula (1)

$$HO \longrightarrow \mathbb{R}^1 \qquad (1)$$

wherein

- R¹ is either H or a CH₃ radical;
- denotes a member selected from the group consisting of H, linear C₁-C₁₈ alkyl, branched C₁-C₁₈ alkyl, linear C₁-C₁₈ alkoxy, branched C₁-C₁₈ alkoxy, Cl, Br, aryl radical and aralkyl radical,
- Z denotes an alkylene having 1 to 30 carbon atoms or a single bond,
- X denotes a single bond or a divalent radical,
- Y denotes a member selected from the group consisting of a cycloaliphatic radical, polycyclic aliphatic radical and an aromatic radical,

and

- n is 1, 2, 3 or 4 and m is 0, 1, 2 or 3, with the proviso that the sum of n plus m is 4, comprising adding said phenol as a chain terminator to the reaction that entails at least one diphenol in the preparation of a member selected from a second group consisting polycarbonate, polyester carbonate and polyester.
- 2. (Original) The polycarbonate prepared by the process of Claim 1.
- 3. (Original) The polyester carbonate prepared by the process of Claim 1.
- 4. (Original) The polyester prepared by the process of Claim 1.
- 5. (Original) A molded article comprising the polycarbonate of Claim 2.
- 6. (Original) A molded article comprising the polyester carbonate of Claim 3.
- 7. (Original) A molded article comprising the polyester of Claim 4.

Claims 8-19 (Cancelled)

- 20. (Original) The process of Claim 1 wherein member of the first group is present in an amount of 0.5 to 8 mol%, relative to the total moles of diphenol.
- 21. (Original) The process of Claim 20 wherein the amount is 2 to 6 mol%.
- 22. (Previously Presented) The compound according to formula (1) according to Claim 1.
- 23. (Previously Presented) The compound of Claim 22 wherein at least one of said aryl radical and aralkyl radical are substituted.

- 24. (Previously Presented) The compound of Claim 22 wherein X denotes a divalent radical selected from the group consisting of -O-, -CO-, CH₂-, -COO- and -OCO₂-.
- 25. (Previously Presented) The compound of Claim 22 wherein Y is substituted.
- 26. (Previously Presented) The process of Claim 1 wherein the o- and/or m-substituent is cycloalkyl.
- 27. (Previously Presented) The process of Claim 1 wherein the member of the first group conform to formula (1)

HO
$$(R^2)_m$$

$$R^1$$

$$(Z-X-Y)_0$$

wherein

- R¹ is either H or a CH₃ radical;
- denotes a member selected from the group consisting of H, linear C₁-C₁₈ alkyl, branched C₁-C₁₈ alkyl, linear C₁-C₁₈ alkoxy, branched C₁-C₁₈ alkoxy, Cl, Br, aryl radical and aralkyl radical,
- Z denotes an alkylene having 1 to 30 carbon atoms or a single bond,
- X denotes a single bond or a divalent radical,
- Y denotes a member selected from the group consisting of a cycloaliphatic radical, polycyclic aliphatic radical and an aromatic radical,

and

- n is 1, 2, 3 or 4 and m is 0, 1, 2 or 3, with the proviso that the sum of n plus m is 4.
- 28. (New) The process of Claim 27 wherein member of the second group is polycarbonate.
- 29. (New) The process of Claim 27 wherein member of the second group is polyester carbonate.
- 30. (New) The process of Claim 27 wherein member of the second group is polyester.
- 31. (New) The polycarbonate prepared by the process of Claim 28.
- 32. (New) The polyester carbonate prepared by the process of Claim 29.
- 33. (New) The polyester prepared by the process of Claim 30.
